DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935): Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 4/25/2005 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-9 and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by T Nomura et al. "A bitrate and bandwidth scalable celp coder"

As to claim 1, Numura teaches a wide band speech coder, comprising:

Means for splitting an input signal into narrow and wide band signals;

Down-sampling means for down-sampling the lower frequency signals and low-band of the signal;

Encoding means for encoding the down sampled signal; and

Multiplexing the two signals (Fig.1).

As to claim 2, the frequency divider in Nomura inherently consists a bandpass filter.

As to claims 4-9, the encoder in Nomura is a CELP and an LPC coder (Fig.2).

With respect to claims 16-20, the decoder for reproducing the signals encoded at the encoder is shown by Nomura (Fig.1) also the multipulse excitation code and gain generator are shown in fig.2.

Allowable Subject Matter

Claims 10-15 are allowed.

The following is an examiner's statement of reasons for allowance: the claims are allowed, because Nomura doesn't teach low pass filtering the lower sub band signal at the decoder as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sakamoto et al. (5,459,514), see Fig.1
